

## WITS Changes – 18.11-18.12.1 Release SUD

09/02/2016

In the 18.11-18.12.1 multiple bugs were repaired in WITS. Below are a summary of the errors and the resolutions of the problems.

Issue	Resolution
<b>Claim Batch Generator: Not batching all claims if Rendering Staff is missing</b>	Fixed an error that would occur if the Rendering Staff is missing on the Encounter record.
<b>Follow Up: Tabbing order does not tab through all the fields</b>	Tabbing order is now working and the users can tab through all the fields on the screen
<b>Staff Types: Update clinical indicator on staff types</b>	Clinical Indicator values are updated for staff types. And staff members will be filtered by the clinical indicator of their staff types, on certain screens (Tx Plan: Planned Services, Tx Plan: Medication, and Client Diagnoses screens).
<b>Client Profile: Military information values are getting wiped out after referral is accepted</b>	Client Profile: Values entered on military information screen are retained in the referring agency after the referral is accepted.
<b>Formatting: Users cannot scroll down on text boxes using the "down arrow"</b>	Text Box: Text boxes are formatted so that the expand arrow does not overlap the scroll down button and the users can now easily scroll without having to resize the Text box
<b>Treatment Plan: User cannot make changes on it because of timeout yellow screen</b>	Treatment Plan: Fixed a timeout issue that could occur when editing a Treatment Plan.
<b>Tx Plan: Unable to get out of Edit Diagnosis screen due to 'Save or Cancel' loop</b>	Edit Diagnosis screen can be saved without any error messages when navigated from Plan Outline screen under Tx Review
<b>ASAM: Populating from the admission instead of the previous ASAM</b>	When the Admission Date is the same as the date of an ASAM, subsequent ASAMS will now be populated from the most recent ASAM, regardless of the source.
